Each year Nexans certified trainers are invited to participate in a 2 day Train The Trainer to update their knowledge on the latest developments in Structured Cabling. A yearly update allows Nexans Cabling Solutions to maintain the high quality of training throughout the different regions of the world.

This year the TTT landed in the Tulip inn Hotel near the centre of Brussels with 21 Trainers from 16 countries attending. The mixture of different cultures is a benefit in exchanging typical regional information allowing the sessions to be very interactive.

Thanks to the support of NCS marketing team and the R&D engineers both theoretical presentations and practical workshops where part of the agenda.

During the TTT Event the new modular training program was presented. The training package has been divided into different modules which are all addressing different topics aimed at different people.

- Installers
- Project Manager
- Designers, Consultants and Architects
- Commercial Staff that would like to improve their sales techniques
- End Users

For more information download the Training Schedule document from our website and contact your local Nexans Cabling Systems representative.
